

Ocean Connections by The Conservationist Collective

Lesson 4: A Sustainable Future Class discussion – Student Worksheet

1.	Think about the environment that you live in. What type of renewable energy would best suit where you live?
2.	Now that you have an understanding of the impact some animal foods, like beef, have on the environment, list 3 of your favorite foods that come from plants!
3.	Think about the conservation victory of dolphin-safe tuna label. This certification is a result of the general public expressing concerns to companies and politicians about dolphin bycatch. What topic that you learned about this week would you want to express concern about?
4.	Think more about the topic you listed above. What company or politician would you write to? What would you say?
